SUSPENSION CONCENTRATE
TERMITICIDE (KIUAMCHWA)

600 GUARANTEE (DHAMANA): Fipronil 96 g/L

COMMERCIAL AND AGRICULTURAL CLASS (KUNDI LA KILIMO NA BIASHARA)

Termidor® 96 SC is a termiticide for the control of Termites in buildings and construction industry by professional Pest control operators.

500 Termidor® 96 SC hutumiwa kuzua, kulinda au kuangamiza mchwa katika majengo na viwanda vya ujenzi.

Shelf life: Two years from the date of manufacture in tightly sealed original unopened containers under cool and dry storage conditions.

(Maisha Rafuni: Miaka miwili kutoka tarehe ya kutengenezwa ikiwa katika chombo chake asili kisichofunguliwa na ikiwekwa katika pahali pakavu pasipo na joto jingi).

DIRECTIONS FOR USE:

Termidor® 96 SC is used in- and outdoors by professional pest control operators for preventive pre-construction and curative post-construction treatments against termites in industrial, domestic and public buildings as a chemical barrier. It can also be used to control termites in lawns and gardens. Termidor® 96 SC should be applied in a manner to provide a continuous treated zone to prevent termites from infesting the wood to be protected.

MODE OF ACTION:

Fipronil is a contact/ingestion insecticide acting on the insect nervous system. More specifically, it is a potent GABA-gated chloride channel antagonist. Fipronil interferes with the passage of chloride ions through the GABA regulated chloride channel thereby disrupting the central nervous system activity and, in sufficient doses, causing death. Furthermore, there is target site specificity between insects and mammals, with fipronil displaying tighter binding (higher potency) in the insect GABA chloride channel than in the invertebrate, providing selective toxicity. The balance between contact and ingestion action varies according to insects.

MIXING INSTRUCTIONS:

Fill the spray tank halfway with water. Start agitator mechanism and slowly add the required amount of Termidor® 96 SC. Add water to the final volume required with continuous agitation.

RATE OF APPLICATION:**PRE-CONSTRUCTION PREVENTIVE APPLICATION**

All existing active termite colonies situated within 50 m of the structures perimeter (or within the property boundary, whichever distance is the shorter), should be treated with Termidor® 96 SC (see below). The treatment of surrounding nests will assist in preventing attack on structures subsequently erected on the site.

All cellulose containing material (wood, paper, cardboard etc.), that may serve as a food source for termites should be removed from the site before treatment. Any structures should in particular not be erected over such food sources (i.e. floors, slabs, paving etc. should not be built over lumber scraps left over from construction work).

Do not apply Termidor® 96 SC to excessively wet soil. If more than 15 mm rain falls within 24 hours after application, the application should be repeated unless the treated soil was adequately protected.

In all cases the treated soil surface should not be disturbed after treatment, as this may damage the treated barrier, allowing termites access to the structure through such areas.

Location	Dosage/100L water	Method of application
Foundation and service rate of trenches and foundation walls	0.25L	The bottom and sides of foundation and service trenches must be treated at the 5L mixture per linear metre. Service trenches must be treated for their full length inside the building. All inner foundation walls must be treated on both sides and outer foundation walls on the inside at a rate of 5L mixture per linear metre.

Location	Dosage/100L water	Method of application
Soil surface under floor slabs	0.25L	Apply 5L mixture per 1m ² on the soil surface where the floor will be cast. Ensure that the coverage is good where cables and / or piping enter the building.
Suspended floors	0.25L	The surface of the crawl space and the enclosing walls must be treated at a rate of 5L mixture per 1m ² . Ensure that the coverage is good where cables and / or piping enter the building.
Pile and beam construction	0.25L	The bottom surface of pile and beam foundations must be treated at the rate of 5L mixture per 1m ² , after compaction and before the concrete is cast.
Unexposed soil	0.25L	Apply 5L of the mixture per 1m ² on the soil surface where paving, entrance steps, verandas etc. will be connected to the structure.

POST-CONSTRUCTION REMEDIAL APPLICATION

With remedial treatments it is important that the application is carried out in such a way that the Termidor® 96 SC is distributed in a continuous layer in the soil under existing structures. The most common reason for the failure of remedial treatments is, that the remedy is not distributed in a continuous layer. Any gaps in a soil barrier treatment are rapidly exploited by termites, to gain access to the structure. This is particularly important under solid floors, where it is often difficult to get the remedy to distribute evenly under the floor in the compacted soil.

Location	Dosage/100L water	Method of application
Perimeter treatment	0.25L	Dig a 30cm wide trench around the exterior perimeter of the foundations and as deep as the top of the footing. Apply 5L mixture per linear metre of the trench. Both the sides and bottom of the trench must be adequately covered by the application. The trench must be backfilled and compacted. This treatment must be done in sections of 3 to 6m at a time in order not to weaken the foundations.

Location	Dosage/100L water	Method of application
Solid floors	0.25L	Drill holes approximately 20cm apart through the floor around the inside perimeter of each room, and around the outside perimeter of the structure. Holes should be drilled to the top of the footing of the foundation. If the design of the building is such that vertical holes cannot be drilled through the floor along the outside perimeter, then horizontal holes, approximately 1m apart, must be drilled from the outside through the foundation wall, into the soil underneath the solid floors. Apply 1L mixture per hole. Holes should be suitably sealed after application..
Suspended floors	0.25L	Where possible, a 30cm wide trench should be dug around the inside of the foundation walls, as deep as the top of the footing and treated with 5L mixture per linear metre. The trench must be backfilled and compacted. This treatment must be done in sections of 3 to 6m at a time in order not to weaken the foundations. Treat the surface of the crawl space and the enclosing walls at a rate of 5L mixture per m ² . The treated surfaces should not be disturbed. If there is no access to the sub-floor, access openings should be cut into the floorboards and the treatment carried out as described above. The removed sections must be replaced after application and sealed. Where no crawl space exists, holes can be drilled through the floor at regular intervals and the soil surface flooded with the mixture at a rate of 5L mixture per m ² . The holes must be plugged and sealed after application.

WOOD PROTECTION:

Location	Dosage/100L water	Method of application
Wood Preservation	0.25L	Apply 0.25 L/m ² using the following 2 techniques: Preventive: Apply the mixture by either dipping or brushing the building material thoroughly. To stop attack: use a coarse droplet to evenly coat the infested wooden or bamboo fixture.

TREATMENT OF EXISTING TERMITE MOUNDS / COLONIES:

Location	Dosage/100L water	Method of application
Nest or Mound	0.25L	Apply 5L mixture to the termite nest in the following way: Termite mounds: Remove the top of the mound with a spade or small axe and pour 5L of the mixture into the termite nest. Termite mounds with "chimneys" (e.g. Odontotermesspp.): Pour 5L mixture into as many chimneys as can be found. Divide the 5L mixture evenly between the various chimneys.

RE-ENTRY INTERVAL: do not re-enter treated area until spray has dried.

RESISTANCE MANAGEMENT

Termidor® 96 SC is a Group Code 2B insecticide. Any insect population may contain individuals naturally resistant to Termidor® 96 SC and other Group Code 2B insecticides. The resistant individuals can eventually dominate the insect population if these insecticides are used repeatedly and exclusively in programs. These resistant insects may not be controlled by Termidor® 96 SC or any other Group Code 2B insecticides.

To delay insecticide resistance:

- Avoid exclusive/repeated use of insecticides from the same Insecticide Group Code. Alternate or tank-mix with products from different Insecticide Group Codes.
- For tank mixing or alternation with products in other Insecticide Group Codes, refer to applicable individual product labels.
- Integrate other control methods (chemical, cultural, biological) into pest control programs.

SAFETY PRECAUTIONS:

No special measures necessary if stored and handled correctly. Do not breathe vapour/spray. Use personal protective clothing and gloves. Avoid contact with the skin, eyes and clothing. Ensure thorough ventilation of stores and work areas. When using do not eat, drink or smoke. Hands and/or face should be washed before breaks and at the end of the shift. Do not discharge into drains/surface waters/groundwater. Do not discharge into the subsoil/soil.

Residents and pets should not be allowed in a room being treated. Ensure all heating/air conditioning ducts, air vents, plumbing pipes, server lines, floor drains, heating pipes and electrical lines/conduits are known and identified before commencing any application: do not puncture or contaminate any of these. Avoid application around edible plants.

LEAK AND SPILLS:

Use personal protective clothing. Avoid contact with the skin, eyes and clothing. Do not breathe vapour/spray. Do not discharge into the subsoil/soil. Do not discharge into drains/surface waters/groundwater.

For small amounts: Pick up with suitable absorbent material (e.g. sand, sawdust, general-purpose binder, kieselguhr).

For large amounts: Dike spillage. Pump off product.

Dispose of absorbed material in accordance with National legislation and Regulations. Collect waste in suitable containers, which can be labeled and sealed. Clean contaminated floors and objects thoroughly with water and detergents, observing environmental regulations.

STORAGE:

Keep away from food, drink and animal feeding stuffs. Keep out of reach of children. Store in original container tightly closed, in a safe place. Protect against moisture. Keep away from heat. Protect from direct sunlight.

Protect from temperatures above: 40 °C Changes in the properties of the product may occur if substance/product is stored above indicated temperature for extended periods of time.

DISPOSAL:

Must be sent to a suitable incineration plant, observing local regulations. Contaminated packaging should be emptied as far as possible and disposed of in the same manner as the substance/product.

ENVIRONMENTAL HAZARDS:

Very toxic to aquatic organisms, may cause long-term effects in the aquatic environment.

FIRST AID MEASURES:

General advice: Avoid contact with the skin, eyes and clothing. First aid personnel should pay attention to their own safety. If the patient is likely to become unconscious, place and transport in stable sideways position (recovery position). Immediately remove contaminated clothing. Show container, label and/or safety data sheet to physician.

If Inhaled: Keep patient calm, remove to fresh air and seek medical attention.

Eye contact: Immediately wash affected eyes for at least 15 minutes under running water, with eyelids open. Consult an eye specialist.

Skin contact: After contact with skin, wash thoroughly with soap and water. Seek medical attention.

Ingestion: Immediately rinse mouth and then drink 200-300 ml of water. Seek medical attention.

TOXICOLOGICAL INFORMATION:

Signs and Symptoms of Poisoning: No significant reaction of the human body to the product known.

Poisoning Antidote: No specific antidote. Treat symptomatically.

Note to Physician: Treat according to symptoms (decontamination, vital functions), no known specific antidote.

In case of poisoning call Toll Free number 0800720021 / 0800730030 (24 Hrs)

TAKE PATIENT TO DOCTOR**NOTICE TO USERS:**

This pest control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use or store a pest control product under unsafe conditions.

WARRANTY:

Seller's guarantee is limited to the terms set out on this label and subject there to the buyer who assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

MAPENDEKEZO YA UTUMIAJI:

Termidor® 96 SC ni kiuamchwa kifanyacho kazi kupitia kugusa au kumezwa. Dawa hii huangamiza na kuzua mchwa kwa muda mrefu katika majengo na viwanda nya ujenzi pamoa na kwenye viwanda nya nasi na mashamba. Termidor® 96 SC ni dawa yenye nguvu iliyotengenezwa kutumia teknolojia mpya ya kutumia kiasi kidogo cha dawa. Inaweza kutumiwa kwa kuzuia, kulinda au kuangamiza mchwa kwa mijengo

JINSI INAVYOFANYA KAZI:

Termidor® 96 SC ni kiuamchwa kifanyacho kazi kupitia kugusa au kumezwa inayodhuru neva ya wadudu. Fipronil huathiri kifungu cha ions hidrojeni kupitia GABA hiyo basi kusitisha mfumo mkuu wa neva na hiyo basi kusababisha kifo.

MAELEZO YA KUCHANGANYA:

Jaza tanki la kunyuniyizia na maji safi hadi nusu. Tingiza dawa vizuri kabla ya kuifungua kisha upime kiasi cha Termidor® 96 SC kinachohitajika na uongeze kwenye tanki la kunyuniyizia. Jaza tanki hilo na maji safi na uendelee kuchanganya na kutikisa. Endelea kukoroga vizuriunaponyunyizia.

KIASI CHA KUTUMIA

KIASI CHA DAWA KINACHOHITAJIKA KUZUIA MCHWA KABLA YA UJENZI

Makoloni zote za mchwa zilizopo ndani ya mita 50 ya miundo mzunguko (au ndani ya mipaka kwa hali yoyote), lazima yatibiwe na Termidor® 96 SC. Matibabu ya viota jirani utasaidia katika kuzuia mashambulizi ya miundo yaliyojengwa katika eneo la ujenzi.

Vifaa vyenye cellulose (mbao, karatasi, kadi nk), ambavyo vinawea kutumika kama chanzo cha chakula kwa mchwa vyapaswa kuondolewa kutoka eneo la ujenzi kabla ya matibabu.

Miundo yoyote haipaswi kujengwa juu ya vyanzo vya chakula (kama vile; sakafu, slabs, n.k haipaswi kujengwa juu ya vyuma chakavu, mbao kutoka na mabaki ya kazi ya ujenzi)

Usinyunyizie Termidor® 96 SC kwa udongo uliyo na maji kupita kiasi. Kama mvua inayozidi milimiza 15 itanyesha ndani ya masaa 24 baada ya unyuniyizaji wa Termidor® 96 SC, lazima dawa inyuniyizwetena; isipokuwa kama udongo ulikuwa umetibiwa katika ulinzi wa kutosha .

Katika matukio yote, udongo uliotibiwa haipaswi kusumbuliwa baada ya matibabu, kwa sababu hii inaweza zuia dawa kufanya kazipalipotibiwa hiyo basi kuruhusu mchwa kupitia maeneo hayo.

Mahali	Kipimo/Lita 100 ya maji	Jinsi ya kutumia
Msingi wa jengo, mitaro, kuta	Lita 0.25	Chini na pande ya msingi wa jengo na mitaro lazima kutibiwa kutumia mchanganyiko wa dawa kiasi cha lita tano kwa mita kwenye mstari sahihi. Mitaro lazima kutibiwa kwa urefu wao wote ndani ya jengo. Ndani ya kuta ya msingi lazima kutibiwa kwa pande zote mbili na nje za kuta ya msingi kwa upande wa ndani kwa kiwango cha mchanganyiko wa dawa kiasi cha lita tano kwa mita kwenye mstari sahihi.

Mahali	Kipimo/Lita 100 ya maji	Jinsi ya kutumia
Uso wa udongo chini ya sakafu	Lita 0.25	Nyuniyiza mchanganyiko wa dawa kiasi cha lita tano kwa mita moja miraba juu ya uso wa udongo ambapo sakafu itaeneewa. Hakikisha kwamba matone yaliyo bora ya dawa yameingia katika pahali nyaya na / au bomba zinazoingia kwenye jengo zitapitia.
Sakafu zilizosimamishwa	Lita 0.25	Uso wa nafasi ya kutambaa na ukuta unaozozunguka jengo lazima kutibiwa kwa kiwango cha mchanganyiko wa dawa kiasi cha lita tano kwa mita moja mraba. Hakikisha kwamba matone yaliyo bora ya dawa yameingia katika pahali nyaya na / au bomba zinazoingia kwenye jengo zitapitia.
Ujenzi wa Nguzo('Pile') na boriti ('beam')	Lita 0.25	Uso ulio chirini ya misingi wa rundo na boriti lazima kutibiwa kwa kiwango cha mchanganyiko wa dawa kiasi cha lita tano kwa mita moja mraba, kabla ya saruji kueneewa.
Udongo usiowazi	Lita 0.25	Nyuniyiza mchanganyiko wa dawa kiasi cha lita tano kwa mita moja mraba pahali udongo unaguzama na sakifu, hatua ya miango, verandas nk. zitashikamana na jengo.

KIASI CHA DAWA KINACHOHITAJIKA KUZUIA MCHWA BAADA YA UJENZI

Kwa matibabu kizui, ni muhimu kwamba unyuniyizaji ufanyike katika namna ambayo Termidor® 96 SC itasambazwa katika Udongo kwenye sehemu ambayo miundo yapo. Kushindwa kwa matibabu kizui kwa mara nyiningi husababishwa na kutosambazwa kwa dawa katika safu kwa njia ilio sahihi. Kukiwa na upungufu katika matibabu kwenye udongo huwa kunasababisha mchwa kupata njia ya kuingia kwenye mijengo. Hii ni hasa muhimu chini ya sakafu imara, ambapo mara nyiningi ni vigumu kupata dawa ya kusambaza sawasawa chini ya sakafu katika udongo ulioshikana sana.

Mahali	Kipimo/Lita 100 ya maji	Jinsi ya kutumia
Matibabu ya mzunguko wa jengo	Lita 0.25	Chimba mtaro wenye upana wa sentimita 30 kuzunguka eneo nye ya misingi na kama kina juu ya cheo. Nyuniyiza mchanganyiko wa dawa kiasi cha lita tano kwa mita kwenye mstari sahihi wa mtaro. Pande zote mbili na chini ya mtaro lazima zipata dawa ya kutosha. Mitaro lazima yajawze vizuri na yashikane vizuri. Tiba hii ni lazima kufanyika katika sehemu ya mita 3 hadi 6 kwa wakati isidhoofishe misingi.

Mahali	Kipimo/Lita 100 ya maji	Jinsi ya kutumia
Sakafu	Lita 0.25	<p>Toboa mashimo takriban sentimita 20 kwa umbali kwa njia ya sakafu ikizunguka ndani ya mzunguko wa kila chumba, na kuzunguka nje ya mzunguko wa jengo. Mashimo lazima yatbolewe juu ya cheo cha msingi wa jengo.</p> <p>Kama muundo wa ujenzi ni kama kwamba mashimo wima hayawesi kutbolewe kwa njia ya sakafu pamoja na ya mzunguko wa nje, basi toboa mashimo mlalo, takriban ya mita 1 kwa umbali, kutoka nje kupitia ukuta msingi, katika udongo wa chini ya sakafu imara.</p> <p>Nyunyiza mchanganyiko wa lita kwa kila shimo. Mashimo lazima yafunikwe vizuri baada ya unyuniyizaji.</p>
Sakafu zilizosimamishwa	Lita 0.25	<p>Ambapo inavezekana, mitaro yenye upana wa sentinita 30 inatakiwa ichimbwe kuzunguka ndani ya kuta msingi, yenye kina kama juu ya cheo na kutibiwa katika mchanganyiko wa dawa kiasi cha lita tano kwa mita kwenye mstari sahihi. Mitaro lazima ijawze vizuri na ishikane vizuri. Tiba hii ni lazima kufanyaika katika sehemu ya mita 6 kwa wakati isidhoofishe msingi. Uso wa nafasi ya kutambaa na ukuta zinazozunguka jengo lazima itibewe kwa kiwango cha mchanganyiko wa dawa kiasi cha lita tano kwa mita moja mraba. Nyuso zilizotibiiwa, hazipaswi, kusumbuliwa. Kama hakuna upatikanaji wa sakafu ndogo, lazima bodi ya sakafu ikatwe ndio unyuniyizaji ufanyakie kama ilivoelezeza hapo juu. Sehemu iliyondolewa wakati wa unyuniyizaji lazima irudishwe mahali pake na izibwe vizuri.</p> <p>Ambapo hakuna nafasi ya kutambaa, mashimo yaweza tobolewa katika njia ya sakafu katika vifundi nya kawaida na uso wa udongo kufurikwa kwa kiwango cha mchanganyiko wa dawa kiasi cha lita tano kwa mita moja mraba. Mashimo lazima yazibwe baada ya kunyuniyizwa dawa.</p>

KUTIBU MBAO

Mahali	Kipimo/Lita 100 ya maji	Jinsi ya kutumia
Mbao (Kulinda au kuzuua)	Lita 0.25	<p>CAppling 0.25 L/m² using the following 2 techniques: Preventive: Apply the mixture by either dipping or brushing the building material thoroughly. To stop attack: use a coarse droplet to evenly coat the infested wooden or bamboo fixture.</p> <p>Nyunyiza dawa kwa lita 0.25 kwa mita moja mraba ukitumia mojawapo ya mbini mbili zifuatazo;</p> <p>Kuzuua au kulinda:</p> <p>Nyunyiza mchanganyiko wa dawa kwa njia ya kuchovya au kupaka vifaa nya ujenzi vizuri.</p> <p>Kumaliza shambulizi: Nyunyiza matone makubwa yaliyo bora kwenye mbao zilizoshambuliziwa na mchwa au kwenye mianze.</p>

MATIBABU YA VILIMA VYA MCHWA/MAKOLONI YALIYOPO

Mahali	Kipimo/Lita 100ya maji	Jinsi ya kutumia
Vichunguu au vilima nya mchwa katika mashamba	Lita 0.25	<p>Nyunyiza mchanganyiko wa lita tano ya dawa kwa mojawapo ya njia zifuatazo;</p> <p>Vilima nya mchwa:</p> <p>Chimba juu ya kifusi na jembe au shoka dogo na umwage lita tano za mchanganyiko wa dawa ndani ya kiota mchwa.</p> <p>Vilima nya mchwa vyenye chemli 'chimneys' (mfano 'Odontotermes spp').</p> <p>Mwaga mchanganyiko wa lita tano wa dawa ndani ya chemli 'chimneys' wengi kama iwezekanavyo. Gawanya huo mchanganyiko wa lita tano wa dawa sawasawa kati ya chemli 'chimneys' mbalimbali.</p>

MUDA WA KUNGOJA KABLA KUINGIA MAHALI PALIPONYUNYIZIWA DAWA: Usiingie mahala paliponyunyiziwa dawa kabla ya dawa kukauka.

KUZUIA UZOEFU

Termidor® 96 SC ni kiuadudu kilicho katika kikundi cha viuawadudu kodi 2B. Kwa kila jamii ya wadudu kunaweza patikana idadi ya wadudu wanaoweza kuwa suga kwa Termidor® 96 SC na kwa madawa mengine ya kikundi cha kodi 2B.

Wadudu waliosugu hatimaye wanaweweza kutawala idadi ya wadudu wote kama dawa hizi zitatumika tena na tena na peke yake katika mipango. Hawa wadudu suga wanaweweza kosa kudhibitiwa na Termidor® 96 SC au madawa mengine yoyote katika Kikundi cha kodi 2B.

Kuchelewesha usugu wa dawa:

- Epuka matumizi ya kipekee ya dawa kutoka katika kikundi sawa. Badilisha au changanya na dawa kutoka vikundi mbalimbali.
- Angalia maandiko ya maelezo ya matumizi ya dawa husika kabla ya kuchanganya au kubadilisha dawa.
- Uunganisha na njia nyininge ya udhibiti wa wadudu kama vile (kemikali , kitamaduni, kibaiolojia) katika mipango ya kudhibiti wadudu.

TAHADHARI KWA MTUMIAJI:

Hakuna mikakati maalum muhimu itahitajika kama kuhifadhiwa na kubewa kwa dawa kutafanywa kwa usahihi. Usile, Kunywa au kuvuta sigara unapoitumia dawa hii. Epuka ukungu wa dawa hii. Kila wakati itumiwe penye hewa nyangi safi. Zua isikuguze ngozi au kuingia machoni. Tumia kidude cha kufunika pua na mdomo, vaa glavu, kofia, kikingga uso na viatu virefu. Zua dawa kumwagika kwenye mirea, udongo, mito na mabwawa. Vua mavazi ya kinga baada ya kunyonyiza na unawe mikono, uso na ngozi iliyotupu kwa maji safi na sabuni. Wakazi na wanyama kipenzi hawapaswi kuruhusiwa katika chumba kikifibwi.

Hakikisha vifaa vyote yao joto /na vya kutoa hewa safi, mabomba, mifereji, mabomba ya joto yanajulikana na kutambuliwa kabla ya kuanza unyuniyizaji wa dawa ili kuzuia kutoboka au kuchafuka.

DAWA IKIMWAGIKA:

Jikinge na nguo na vifaa yya kuzuia madhara ya dawa. Zua isikuguze ngozi au kuingia machoni. Epuka ukungu wa dawa hii. Zua dawa kumwagika kwenye, udongo, mito na mabwawa.

Kwa kiasi kidogo cha dawa: Pangaza dawa iliyomwagika na mchanga au yumbi inayopatikana wakati mbaa inapopasuliwa (sawdust), mchanga n.k

Kwa kiasi kikubwa cha dawa: pampu dawa na vifaa vilivyoonyanza dawa vitupwe mahali pazuri mbali kuambatanwa na sheria zilizoko.

Osha mahali au vifaa vilivymwagikiwa na dawa kwa maji mengi na sabuni.

UWEKAJI:

Hifadhi dawa ndani ya pakiti yake halisi mahali ambapo ni salama, kavu, na hakuna joto nyangi, penye hewa nyangi na ni mbali na chakula na watoto hawawezi kufikia. Hifadhi mahali palipo na joto isiyozidi nyuzi 40.

KUTUPA MABAKI:

Haribu chombo cha dawa baada ya kuitumia dawa yote iliyomo halafu itupe mahali palipotengwa mbali na vianzo za maji kuambatanwa na sheria na kanuni za nchi za utupaji wa kemikali.

HADHARI KWA MAZINGIRA:

Dawa hii Ina madhara kwa samaki na viumbe vingine vinavyoishi kwenye maji. Usichafue vidimbwi nya maji kwa dawa hii au mabaki yake. Usioshe vyombo viliviyotumika karibu na mito. Usimwage mabaki kwenye nyumba za wanyama au barabara.

MAELEZO YA HUDUMA YA KWANZA:

Mashauri: Hakikisha dawa isimwigikie ngozi, macho na mavazi. Vua mavazi yenye dawa mara moja. Ukihihi halii mbaya ya afya utumiapo dawa hii, tafadhalii muone daktari na umuonyeshes kibandiko cha dawa hii.

Ikvutwa: Peleka mhadhiriwa mahali penye hewa safi na umweke akiwa mtulivu. Mpeleke kwa daktari

Ikiingia kwa Macho: Osha macho kwa maji mengi yanayotiririka kwa muda wa dakika 15. Mpeleke kwa daktari.

Ikishika Ngozi: Vua mavazi yenye dawa mara moja na usafishe ngozi iliyopata dawa kwa maji mengi. Osha mahali palipopata dawa kwa maji na sabuni. Muone daktari

Ikimezwa: Osha mdomo mara moja. Kunywa maji mengi kiasi cha milimita 200-300 na umuone daktari.

MAELEZO KUHUSU SUMU

Dalili za kusumika: Hakuna madhara kubwa ijulikanayo kwa kutumia dawa hii.

Kiuasumu: Hakuna tiba ijulikanayo kwa sasa. Tibu mgongwa kulingana na dalili za ugonjwa.

Maagizo kwa daktari: Tibu mgongwa kulingana na dalili za ugonjwa.

(Wakati wa madhara piga nambari bila malipo 0800720021 /0800730030 (masaa 24))

PELEKA MJERUHI KWA DAKTARI

ILANI KWA WATUMIAJI:

Dawa hii sharti itumiwe kulingana na maagizo yaliyo kwenye kibandiko hiki tu. Ni hatia chini ya Sheria za madawa ya kuangamiza wadudu waharibifu kutumia au kuhifadhi dawa hii katika hali isiyi salama.

THIBITISHO:

Dhamana ya Muuzaji ni maelezo yaliyo kwenye kibandiko ambayo ni lazima yafuatwe kikamilifu. Mnunuzi lazima akubali hatarai zozote zinazowenza kutokana na matumizi ya dawa hii kwa binadamu au mali na lazima aikubali dawa hii katika hali hiyo
